

Workshop IAMM Beijing Andrew Rossetti MMT, LCAT, MT-BC

Title:

Medical Music Psychotherapy in Cancer Care: Addressing Emotional Trauma, Pain, and Symptom Management in Patients Receiving Cancer Treatment

Summary:

This workshop will explore Medical Music Psychotherapy theory and methodology in its application to inpatient and ambulatory integrative cancer treatment. It will include an in-depth look at current trauma theory, through phase-oriented models, and current treatment strategies inclusion in music therapy to process trauma, and palliate the Acute Stress Disorder and Post Traumatic Stress pervasive in cancer patients. It will also explore current theory and methodology of biopsychosocial strategies in providing pain management, as well as management of other pervasive symptomology arising from allopathic cancer treatment. Experientials will be provided for a practical and hands-on learning experience.
